Powerful Non-lethal Self Defense Tools

STOP THREATS AT A DISTANCE.

STOP THREATS AT A DISTANCE.

STOP THREATS AT A DISTANCE.

Guardian Angel

Effective range 4 meters at 145 km/h.

The new Guardian Angel® is the most advanced non-lethal self defense tool available today. It renders pepper sprays obsolete and stops threats at a safe distance. Small, light and ergonomic, it carries easily in pocket or purse, and an integral clip also secures it to a belt. The outer body conforms to either a right or left-hand grip, and fits almost any size hand. The Guardian Angel contains two cylinders with powerful concentrations of high grade OC (Oleoresin Capsicum), a devastatingly effective inflammatory agent. Driven by a patented propulsion system, the solution travels at 145 km/h (90 MPH) with little chance of cross-contamination, and with enough energy to wrap around glasses or penetrate a face mask. Effect is immediate and lasts for up to 45 minutes. Unlike conventional sprays, the Guardian Angel does not lose pressure over time.

- Instantly incapacitates an assailant.
- Much more effective than sprays.
- Revolutionary non-aerosol propulsion.
- Jet delivery stops cross-contamination.
- Delivers two powerful blasts of OC.

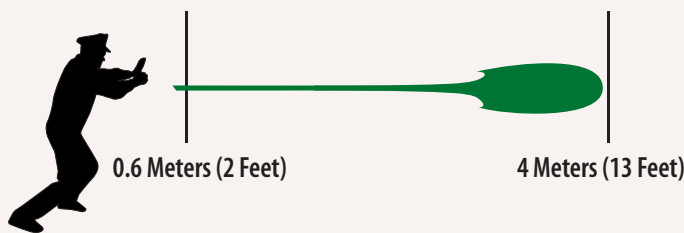

Conventional trigger is shielded by swing-away safety tab to protect against accidental discharge.

Inert orange Guardian Angel training unit with blue marker die is also available.

For additional carry options, a black cordura carry pouch is sold separately.

The Guardian Angel is effective at distances up to 4 meters (13 feet). At 145 km/h (90 MPH), the charge travels too fast to avoid. Effect is immediate, and lasts for up to 45 minutes.

Tips for Use!

Easy to use!

- Push the safety tab away. Command threat to stop.
- If threat advances, aim and pull the trigger.
- Observe reaction. Aim and fire again if necessary.
- Move quickly away from threat. Call the police.

JPX Jet Protector

Effective range 6.5 meters at 430 km/h.

The new JPX™ Jet Protector® is the most functional and powerful hand-held OC delivery system available today. The conventional design speeds training and ensures accurate solution delivery, and a patented propulsion system launches high grade OC solution at 430 km/h (270 MPH). Effective range is up to 5 meters (16 feet) in the model recommended for general use and up to 6.5 meters (21 feet) in the model recommended for law enforcement. Each magazine contains two charges with a much larger payload than the Guardian Angel, and quickly snaps on the frame. The power of each payload combined with reloading makes the JPX extremely effective for interventions. Pull of the conventional double action only trigger is smooth with a pronounced release point, and the trigger automatically resets to fire the other charge. Orange or black frames are available, and an integral laser sight is optional.

- Instantly incapacitates an assailant.
- Revolutionary non-aerosol propulsion.
- Jet delivery stops cross-contamination.
- Each magazine contains two powerful blasts.
- Reloading is both easy and fast.

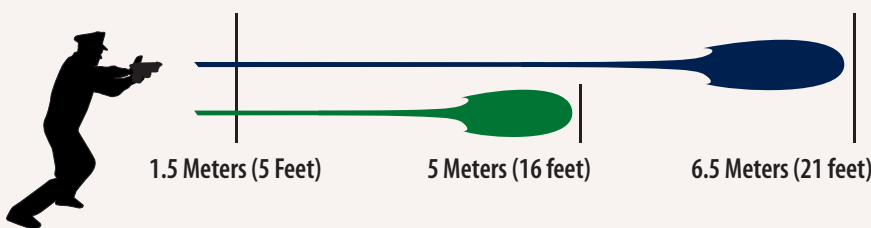

Standard features include Picatinny rail for mounting accessories or lights. Integral laser sight is optional.

Conventional double action only trigger with smooth pull and pronounced release point. Reset is automatic.

Extra two-shot magazines quickly snap into position. In addition to live OC, inert training magazines with dye are also available.

*Effective range of the JPX Jet Protector recommended for general use is up to 5 meters (16 feet). The effective range of the JPX Jet Protector recommended for law enforcement use is up to 6.5 meters (21 feet).

■	Law Enforcement Applications
■	General Use

Tips for Use!

Unequaled non-lethal power

- Command threat to stop.
- If threat continues to advance, aim and pull trigger.
- Evaluate threat status. Fire again if necessary. Reload.
- Civilians should then leave area and call the police.

Guardian Angel

Effective range 4 meters at 145 km/h.

Specifications

Size	Length: 110 mm (4.3 inches), Height: 70 mm (2.7 inches), Width: 23 mm (0.9 inches)
Weight (charged)	120 grams (4.2 ounces)
Effective range, model recommended for general use	Up to 4 meters (13 feet)
Effective range, model recommended for law enforcement use	N/A
Operation	Double-action with automatic switchover. Trigger safety.
Content	2 charges filled with liquid irritant
Volume per charge	6 ml (0.21 fluid ounces)
Irritant agent	10% OC (oleoresin capsicum) with 2.4% Capsaicinoids
Charge velocity	145 km/h / 40 m/s / 90 MPH
Operating temperature range	-20°C (-5°F) to +80°C (176°F)
Trigger pull weight	3kg (6.6 pounds)
Drop safety	Drop tested up to 1.5 meters (5 feet)
Water resistance	Yes
Carry pouch (available separately)	Black cordura carry pouch
Available colors	Black
Warranty	Three years on operating mechanism (see expiration date on device)
Training unit	Inert available, filled with blue food grade die marker. Orange body.
Package contents	Guardian Angel, owner's manual
Open sights	No
Options	N/A
Additional features	N/A

JPX

Effective range 6.5 meters at 430 km/h.

Specifications

Size	Length: 190 mm (7.48 inches), Height: 90 mm (3.54 inches), Width: 37 mm (1.46 inches)
Weight (charged)	370 grams (13.0 ounces)
Effective range, model recommended for general use	Up to 5 meters (16 feet)
Effective range, model recommended for law enforcement use	Up to 6.5 meters (21 feet)
Operation	Double-action with automatic switchover.
Content	2 charges per magazine, filled with liquid irritant
Volume per charge	11 ml (0.39 fluid ounces)
Irritant agent	10% OC (oleoresin capsicum) with 2.4% Capsaicinoids
Charge velocity	430 km/h / 120 m/s / 270 MPH
Operating temperature range	-20°C (-5°F) to +80°C (176°F)
Drop safety	Drop tested up to 1.5 meters (5 feet)
Water resistance	Yes
Carry pouch (available separately)	Belt holster
Available colors	Orange or black frame
Warranty	24 months on the frame
Training unit	Training magazine filled with blue food grade die marker.
Package contents	JPX frame, owners manual
Open sights	Yes
Options	Integral laser sight
Additional features	Mil-spec Picatinny rail for light mounting

Piexon® products deliver multiple shots of a powerful liquid solution containing 10% oleoresin capsicum (OC) with 2.4% capsaicinoid content. An extract of the cayenne pepper plant, OC is the most effective inflammatory agent available today and is successfully used by law enforcement and military. OC is superior to CS and CN tear gas when used against psychotics, and assailants under the influence of drugs or alcohol.
