IMGASA NON-LETHAL SELF DEFENSE 2011

Warning – Using any other pistol for training or shooting pepper balls is dangerous. Hot pepper powder balls that break inside the gun will contaminate the shooter's face and make the shooter less able to defend himself by affecting his vision and breathing. Please consider what can happen using inferior equipment for self-defense.

TIBERIUS T8.1 NON-LETHAL PISTOL SHORT AND MEDIUM RANGE 1 TO 4 ATTACKERS

The magazine holds a 12 gram disposable CO2 cartridge that powers up to twenty four shots before needing replacement. The most unique feature of the T8.1 Pistol is that it reseals itself when the magazine is removed for reloading. Resealing preserves the remaining CO2 pressure. The pistol frame is made of high impact stainless steel, urethane, and aircraft aluminum for the highest durability under rough use.

Highly accurate with an advanced regulator, adjustable velocity 250-350+ fps, effective range 75 feet, maximum range 150 feet. Consistent performance under all weather condition and under rapid fire. Quick release barrel for easy cleaning and maintenance, light and compact, innovative resealing CO2 system, 8 round, magazine-fed system.

Tiberius T8.1 Includes Holster, Extra Magazine With Pouch and Maintenance Kit With Spare Parts and Tools
