IMGASA NON-LETHAL SELF DEFENSE 2011

Warning – Using any other shotgun for training or shooting pepper balls is dangerous. Hot pepper powder balls that break inside the gun will contaminate the shooter's face and make the shooter less able to defend himself by affecting his vision and breathing. Please consider what can happen using inferior equipment for self-defense.

UMAREX®

WALTHER®

UMAREX / WALTHER SG68 SHOTGUN SHORT, MEDIUM AND LONG RANGE 1 TO 4 ATTACKERS

Pump action 16 shot shotgun with one in the chamber and 15 in the tube magazine. Made in Germany. Power supply is two 12 gram CO2 Cartridges concealed in the butt stock. The butt stock is designed as an emergency puncture and charge system. The cartridges are ready but not punctured. Simply tap the butt stock on the ground and the shotgun is instantly ready to fire. One loaded butt stock shoots approximately 60 balls of pepper powder or hard rubber pain compliance or glass breaker type. The velocity is adjustable up to 380 feet per second with an effective range of over 150 feet. Highly accurate iron sight system.

The appearance of the shotgun is completely real. There is no indication it is not a real shotgun. This is an excellent intimidation feature.
